DETAILED ACTION

1. Applicant's election without traverse of Group I, claims 1-66 in Paper No. 7 is acknowledged.
2. Claims 67-74 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.
3. Upon further consideration the examiner has determined that Group I, claims 1-66, drawn to an assembly apparatus and method of using, additionally includes multiple inventions and therefore is required to be further restricted.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-31 and 51-66, drawn to a workholder apparatus, classified in class 269, subclass 55.
 - II. Claims 32-50, drawn to a surface bonding apparatus, classified in class 156, subclass 349
5. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an apparatus for moving devices that are not required to be bonded using an adhesive coating. See MPEP § 806.05(d).

Art Unit: 1756

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. An Information Disclosure Statement was received on 2/7/02 and on 7/29/03. They will be considered when the first action on the merits is conducted.

8. The preliminary amendment was received on 11/8/01 and was entered.
